Our Camp's Policy For Administration of Doctor Prescribed Medications

If your child is taking prescribed medications, **their medication schedule MUST be maintained while they are at Camp.** Many doctors recommend taking children off behaviour medications during summer vacation, so as to give them a break from the medications they take during school year. However, **it is our Camp's policy that their behaviour medications must be maintained during the summer if they are going to come to Camp.** We have found that many children who take behaviour medications, need to be maintained on their meds in order for them to fully participate in our team based camp program and to help them cope better in their social inter-relationships with the other children and our staff. Many children who are on behaviour medications find that Camp can be just as demanding and challenging as their time at school.

For the safety of all campers and staff, all your child's medications MUST be turned into the Camp Director or his designated staff person immediately when you arrive at Camp or the drop-off location.

In the registration form Parents and Guardians will be asked to give consent for the Camp staff to assist their child in taking their Doctor Prescribed Medications.

Please ensure that any prescribed medication bottles and/or puffer that your child brings to Camp for their use during their attendance at Camp are in the original package and clearly labeled with your child's name and with the required daily dosage and any other administration instructions. If the medications are in a daily dosage blister pack or dosette tray, the pharmacist's Medication Information Sheet(s) must also be provided as well.

You will have the opportunity to list all the medications your child takes in the registration form. Then please click on the button to give us your consent to assist your child take the medication while they are at Camp. Then on the day when you arrive to drop off your child we will review with you the dosage amount of each medication and the time when your child is to receive that dosage.
